For other choices see Nursing and Health Databases

Journal Titles A-Z list
Nursing Subject Guide
> Databases > Journal Titles A-Z list
Enter the journal name and find collections/locations for these periodicals in the Ely Library. When you are referred to an electronic resource, search by article title.

Request an Interlibrary Loan
Nursing Subject Research Guide
> Help & Information
> Interlibrary Loan Request
Request an article from a journal not available in the Ely Library collections (check the Journal Titles A – Z list first).

Evidence Based Practice

EBP is a method of effectively translating EBM into clinical practice using the best existing: evidence and research, knowledge of clinical experts, and patient preferences.

This Evidence Hierarchy Pyramid is often used to graphically represent the quality of medical research. The higher on the pyramid the more comprehensive in scope, and more rigorous the methodology and peer review. You should be looking for the highest level of research available in EBP.
